

Know the Volume of Your Pond

Oval Pond ----- Length x Width x Depth x 6.7 =
volume in gallons

OR

Circular Pond ----- Length x Width x Depth x 5.9 =
volume in gallons

OR

For circular ponds with steep sides that drop off quickly

3.14 x (pond radius)² x average depth x 7.5 = volume in
gallons

OR

Rectangular Pond -- Length x Width x Depth x 7.5 =
volume in gallons

OR

*Pond water volume can be calculated by checking the salt
concentration of your water, adding a specific amount of salt,
and re-checking the salt concentration.*

12 x _____ = volume in gallons

**Never add medications or water treatments to
your pond without knowing its total volume!**
